HIS Conference 2017.

Output from Workshop.

Reflect on our conversations over the last two days.

- What are the opportunities for collaboration between central and local government?
- What are the priorities?
- What would get in the way?
- What message would you like CIO to communicate to Sector Leaders?

Group 1

<u>Leverage Economies of Scale</u>

- MS Licencing e.g. specialist teams (cyber, analytics, DRO)
- DR as a service with SLA
- SAAS e.g. email

<u>Barriers</u>

- Time
- Previous experience e.g. forest exit
- Cost

<u>Message</u>

- Be prepared i.e. cyber attack
- IT not cost but opportunity

Group 1

Group 2

Opportunities

- DR as a service
- Security aas A.Edrms
- Office / aas mail

Priorities

- EDRMS
- Security / DR
- Office!

Barriers

- Communication / Collaboration
- Timelines
- IR?
- Cost!

Message

- Investment – NOAC Model / What should it be?

Sell it, and what it could achieve?

Reinvestment of savings into it!

Professionalisation

Group 3

Opportunities

- Shared infrastructure
- Governance around shared projects
- Agility model
- S.L.A's
- Resourcing of data centre
- Establish clear roadmap
- Licencing – a lot of Government approach
- Desktop and shared BIOCD
- DR as a service
- Email as a service

Priorities

- Email
- Roadmap of central portals
- Digital transformation
- Communications between central / local gov and oggio

What would get in the way?

- Lack of S.L.A's
- Engagement strategy
- Financials – like for like
- Existing Governance arrangements
